

Ramona Community Trails and Pathways Plan

Trails: The Community Connection

The Community Trails Master Plan will be utilized to develop a system of interconnected regional and community trails and pathways. These trails and pathways are intended to address an established public need for recreation and transportation, but will also provide health and quality of life benefits associated with hiking, biking, and horseback riding throughout the County’s biologically diverse environments.

Community trails serve a different function than regional trails, which are focused on the provision of long linear distances. Instead, community trails are “local public facilities” in close proximity to residents that provide transportation, recreation, access, infrastructure, linkages, and safe routes throughout a community. The Community Trails Master Plan (CTMP) involves both trail development and management on public, semi-public and private lands. The CTMP has established two forms of non-motorized facilities called “Trails” and “Pathways” that provide passive recreational and alternative modes of transportation.

Ramona Community Trail

Trails are typically away from vehicular roads that are primarily recreational in nature but can also serve as an alternative mode of transportation. They are soft-surface facilities for single or multiple uses by pedestrians, equestrians, and mountain bicyclists.

Pathways are a non-motorized transportation facility located within a parkway or road right of way. A riding and hiking trail located in the road right of way is considered a pathway. They are soft-surfaced

facilities intended to serve both circulation and recreation purposes. Pathways help make critical connections and are an integral part of a functional trail system.

COMMUNITY TRAIL STATEMENT

The community of Ramona is located in the foothills of San Diego County. Pioneers with a rich history of ranching founded it as a prominent stopover for many heading to Julian and beyond. The Butterfield Stage ran through the region. Main Street is unique for having been constructed very wide. Wagons of forgone times had the ability to do a u-turn. Before the Battle of San Pasqual, Kearney and his soldiers rested here beneath the oaks near Highland Valley Road. We refer to Ramona as Valley of the Sun. Coming into Ramona, north on Route 67 by Mt Woodson, it is obvious why, as you drop into a vast valley surrounded by mountains of National Forest. The Santa Maria Valley is home to people who strive to live a rural, country lifestyle. Important to Ramonans is the opportunity to raise their families and livestock on large parcels. Horses are a major part of that lifestyle. It has been shown that the local economy is impacted by conservatively \$24 million annually by the equine industry. Between 8,000 and 12,000 horses reside here. More equestrians are looking to relocate to Ramona from other communities because of the opportunities for pursuing an equestrian lifestyle. Our 4-H and Future Farmers of America (FFA) programs our important to

this community, encouraging our young people to consider careers in agriculture.

Our valley features a variety of environments. The Santa Maria Creek runs through the region, coming from the mountains to the east, through Town Center, the grasslands, and on down Bandy Canyon to connect to the San Dieguito River. There are oak groves, stands of eucalyptus and sycamores. We have a significant inventory of vernal pools and grasslands, which are vital to many species of animals, some endangered or threatened by development.

There are pioneer trails throughout the community. Only a very few have been preserved by dedication thus far. The vision of Ramona Trails Association is to provide a comprehensive trail system that connects all parts of the community. We seek to achieve a trails system that will provide safe, non-motorized routes to schools and public facilities helping to reduce motorized traffic and encourage a healthier mode of transportation.

There is a national health crisis of obesity and heart disease in our country, from our youth to our senior citizens. Trails provide a low-impact exercise opportunity to get away from our televisions and computers and walk a trail. There is a stronger sense of community when neighborhoods are connected with a trail. It has been shown that mental and social well-being is increased by the ability to experience a dirt path. These greenways provide wildlife

corridors and buffer zones. Persons with disabilities are able to share trail experiences, whether by wheelchair or astride an equine. Everyone benefits from trails and pathways.

There are a number of organizations that would benefit from a comprehensive trail system, including several equestrian groups, 4-H, a burgeoning high school agriculture program, Future Farmers of America (FFA), amateur radio, school children for field studies in science and history, orienteering and many youth groups. Ramona is a destination for many bicyclists. Ramona Trails Association (RTA) is the leading organization dedicated to preserving trails in our area. RTA works with local and county agencies to create a trails system in Ramona. This service group participates in many community events including the Ramona Rodeo, July 4th Rotary Fireworks, and the Country Fair. Annually RTA has a fundraising multi use Poker Ride that is very well attended by horseback riders, mountain bikers, and hikers from all over the region.

With our close proximity to the National Forest and other popular recreational venues such as the San Dieguito River Park, Trans-County Trail a.k.a Sea-to-Sea Trail, and the County Open Space Preserves such as Mt. Gower, Simon Park, Barnett Ranch, and San Vicente Highlands, our community can benefit from eco-tourism. It has been proven that properties located adjacent or near a trail have greater value and tend to sell faster.

This community has looked at creating a Parks Authority, which would help to provide construction and maintenance of trails and the public parks they would connect. Ramona Trails Association currently provides part of this service.

As the County of San Diego continues to grow, the community of Ramona strives to retain its rural character. A viable trails system will help to achieve that goal. With such a large population of equestrians it will enhance that way of life. A connective trails system will provide our residents safe and healthy means to get from one place to another while preserving our rural lifestyle.

THE NEED FOR TRAILS

The community trail needs are based on an equation established by the Trails System Assessment (TSA) in 2001, which identified a minimum baseline level of service for each community by population. The Baseline Level of Service or Trail Need is 0.8 miles of trail per 1,000 people.

The “Trail Need” is the minimum length of trail miles (baseline level of service) for each Community and Subregional Plan Area. The TSA calculations for community trail needs are as follows:

- **Trail Need** = (Community Population /1,000 residents x 0.8 miles of trails)
- **2000 Trail Need** = (2000 population /1,000 residents x 0.8 miles of trails)

- **2020 Trail Need** = (2020 population /1,000 residents x 0.8 miles of trails)

Population statistics from the 2000 U.S. Census were used to determine the current trail needs in Ramona. Based on the census, the population of the Ramona Community Plan Area is 33,450 and there is a current need for 27 miles of community trails. In the year 2020, the population is projected to increase to 53,340 and there would be a future need for 43 miles of community trails.

For additional information about the baseline level of service and trail needs, please refer to the discussion under “**The Need for Trails**” and **Tables NT-1 and NT-2** in the CTMP.

COUNTYWIDE TRAIL GOALS AND POLICIES

The “**Countywide Goals and Policies**” contained in the CTMP apply to all community and sub-regional plan areas. Community-specific goals and policies are intended to accommodate specific needs and they will be implemented when feasible. The Ramona Community Planning Group developed Community Specific Goals and Policies for their community trails plan. The abbreviations are as follows:

SG = Community Specific Goal

SP = Community Specific Policy

Goal: SG 1

Expand Ramona’s pathway system to provide convenient and safe connections with the community trail system.

Goal: SG 2

The community will seek support of property owners when important trail connections are needed, the community will seek support of the affected landowner and encourage their voluntary participation.

Goal: SG 3

Trail easements be shared between County and local trail agencies in anticipation of a future parks district.

Policy: SP 1

New pathways are to have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater.

Where Community-specific goals and policies are not addressed, the “**Countywide Goals and Policies**” contained in CTMP shall apply.

DESIGN AND CONSTRUCTION GUIDELINES

Countywide trail guidelines in the Community Trails Master Plan apply to all community and sub-regional plan areas. Ramona has prepared community-specific

COUNTY TRAILS PROGRAM
COMMUNITY TRAILS MASTER PLAN

trail design guidelines. Community-specific guidelines are intended to accommodate specific community needs and the County will implement when feasible. Where Community specific guidelines are not addressed, the Countywide “**Design and Construction Guidelines**” contained in the CTMP shall apply.

Ramona Subdivision Trail

RAMONA COMMUNITY-SPECIFIC TRAIL DESIGN GUIDELINES

| GUIDELINES | NOTES | NOTES | TYPE A | TYPE B | TYPE C | TYPE D |
|------------|-------------------------|-------------|-------------------------------|---------------------------------|----------------------|---------------------------------------|
| | | | Urban/Suburban | Rural | Primitive | Pathway |
| | Tread Width | 1 a b c d e | 10' - 12' | 8' - 10' | 4' - 6' | 15' |
| | Easement Width | 2 3 6 g | 12' - 20' | 10' - 20' | 30' - 50' | 10' - 15' |
| | Function | | Recreation/ Transportation | Recreation/ Transportation | Remote Recreation | Transportation/ Limited Recreation |
| | Slope | 4 | < 15% | < 20% | < 40% | < 15% |
| | Cross Slope | | 1 - 2% | 1 - 5% | 1 - 8% | 1 - 2% |
| | Surface Material | | D.G./ Binding Agent | D.G. or Suitable Native Soil | Suitable Native Soil | D.G./ Binding Agent |
| | Anticipated User Volume | | Hi | Medium | Med - Low | Hi |
| | Horizontal Clearance | 5 | 2' Beyond Tread Edge | At Edge | 1' Beyond Tread Edge | At Edge |
| | Vertical Clearance | f | 12' | 10' | 10' | 12' |

Countywide CTMP Guideline Notes:

- 1) Tread width within the *optimum range will be based on site specific conditions.
- 2) Easement width within the *optimum range will be dependant on topographical or environmental conditions, i.e. steep slope, rugged terrain, rock outcroppings, or sensitive biological resources or habitat will require the maximum easement width.
- 3) The *optimum easement width for any class of trail identified as "Regional" is 20' - 50'.
- 4) These are *optimum slope ranges. The following additional criteria can be applied to Type A and B trails if warranted by site conditions.
 - Ideal : 0% - 5%
 - Acceptable: Average running slope of 10% or less, for distances over 200ft.
 - Acceptable: Average running slope of 15% or less, for distances under 200ft.
 - Acceptable: Average running slope of 20% or less, for distances under 100ft.
 - Sufficient switchbacks should be provided to avoid excessive slopes
- 5) Type B trails at 4 feet shall provide horizontal clearance 1 foot beyond tread edge to a minimum height of 3 feet .
- 6) Pathways are trails within road right-of-way. The minimum width specified corresponds to the current minimum parkway (aka pathway) width in the County Public Road Standards. Depending the on discretionary project being contemplated, an additional 5 feet of road right-of-way may be required, thus providing a total width of 15 feet for pathway / parkway purposes.

Ramona Guideline Notes: (Shaded Areas Represent Augments to the Countywide CTMP Guidelines)

- Exceptions to tread widths are acceptable for short distances where constraints occur i.e.. topographical, environmental, or archeological.
- 8' Minimum tread width is acceptable for trail type A for short distances from exceptions mentioned in note (a) above.
- 4' Minimum tread width is acceptable for type B for short distances under 20' from exception mentioned in note (a) above.
 - 8' - 10' tread width is recommended for public safety when 3 user groups are expected to share a trail in areas where barriers the trail has physical barriers such as fencing.
 - 6' - 8' trail tread where **no** physical barriers exist for sections of trail longer than 20', the trail shall be 8'-10' and a minimum of 4' is allowable for very short segments where topographical situations prohibit recommended width.
- Costs for construction and mitigation for trails in Ramona may be slightly higher because of variances from Countywide Design Guidelines, i.e. increased widths etc....
- Type C trails: 2' is an acceptable minimum where constraints such as topographical, environmental, archeological or where user groups are restricted.
- Optimal pathway/ Type D trail is one having vertical separation from the roadway but implementation is often limited by road right-of-way widths, topographic conditions and increased construction cost.
- Pathways/ Type D trails are to have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater

* "Optimum" means the best or most favorable condition for a particular trail situation from the perspective of responsible management.

RAMONA COMMUNITY TRAIL IMPLEMENTATION INFORMATION

The Ramona Trails Association (RTA) is the leading organization dedicated to preserving trails in Ramona. RTA works with local and county agencies to provide construction and maintenance activities. The Ramona community is considering creating a Parks Authority, which would not only provide construction and maintenance of trails, but also public facilities within local parks.

The Ramona Community Planning Group developed implementation strategies for their community trails plan. The abbreviation is as follows:

SIS = Community Specific Implementation Strategies

Implementation Strategy: SIS 1

New pathways that provide critical connections to the trail system will be identified and added to the CTMP for future implementation.

Implementation Strategy: SIS 2

Where trails or pathways are required as a condition for development, they should be designed to connect with existing and proposed trails or pathways adjacent to the property.

Implementation Strategy: SIS 3

The community will encourage utility providers to allow public trail easements over their utility easements and rights-of-way.

Implementation Strategy: SIS 4

Review tax default properties, vacation of easements and County properties being considered for sale to determine opportunities to secure trail routes.

Implementation Strategy: SIS 5

Encourage Caltrans to provide pathways that are identified on the community trails map within their controlled right-of-way.

Implementation Strategy: SIS 6

Continue to seek support from property owners for trails along existing private roads when important connections are needed.

RAMONA COMMUNITY TRAILS MAP SUMMARY

As a result of the community trails outreach process for development of the CTMP, the Ramona Community Planning Group completed several tasks, and prioritized community trails and pathways as well as their special features. Each trail and pathway was labeled and recorded producing a community trails map and index.

COUNTY TRAILS PROGRAM
COMMUNITY TRAILS MASTER PLAN

Proposed trails shown on trails maps contained in the Community Trail Master Plan depict corridors of general alignments. The term “general alignment” is used to describe the general location of a future trail within a designated corridor so that the specific alignment can be determined during the review and approval process when a discretionary application is submitted for a development permit for land that includes a trail corridor. The designated corridor is approximately one-quarter mile wide. A

general alignment is useful because it allows the trail to be located to avoid extreme topographical conditions, sensitive habitat or other site-specific constraints.

**RAMONA COMMUNITY TRAILS
MAP INDEX**

The following community trails map index was completed by the Ramona Community Planning Group and will be used as a reference tool.
